# The Report of the Secretary of the Association[1]

THIS ANNUAL MEETING marks the close of the fifty-ninth year since a small body of college, university, and high school administrators met at Northwestern University and founded the North Central Association of Colleges and Secondary Schools. During this year the work of the Association has been of two broad types. In accordance with its major purpose it has continued to contribute to the improvement of education in secondary schools, colleges, and universities. It has also undertaken studies of its structure and its practices in an effort to evaluate them and to improve its organization so that it may carry on its functions more effectively.

The purpose of this report is to describe the activities of the Association during the past year. Before undertaking this task it seems appropriate to pay tribute to the many loyal individuals who have given so generously of their time and effort so that the work of the Association might go forward. On behalf of the Association may I extend to all the persons who have labored so devotedly for the welfare of the Association its deep appreciation and thanks for the work they have done so well.

During the past year the Executive Committee has carried on a number of projects which promise to be of great value in education. It has inaugurated a committee on television which is devoting its efforts to a study of the means through which this tool of education may be made more useful in the education of youth and adults and in informing the public about educational activities. The committee on the United States Armed Forces Institute has developed a guidance bulletin for use in high schools among youth who face the problems of induction into the Armed Forces. This bulletin is at present being tried out in a group of high schools located in various states. It is expected that this publication will be ready for distribution among all the high schools of the United States this next September.

In an endeavor to increase general knowledge of the North Central Association the Executive Committee authorized the Committee on Public Relations to publish two issues of the bulletin *That You May Know the North Central Association*. Many thousand copies have been distributed among member schools and colleges for use in informing teachers and the public about the work of the Association.

For some time the Executive Committee has been studying its structure and functions looking toward finding ways of making it a more efficient agent of the Association. As a result of this study the Executive Committee has proposed several amendments to the Constitution of the Association which will come before the Business Meeting of the Association for action. The Executive Committee believes that

[1] Presented at the Annual Business Meeting of the Association in Chicago, March 26, 1954.

these amendments, if adopted, will strengthen the Commissions and make the Executive Committee a more effective instrument for the service of the Association.[2]

The Commission on Colleges and Universities has continued its committee which is engaged in the development of better criteria for the accreditation of junior colleges and its committee which is studying the library in institutions of higher learning. It has also initiated several projects whose culmination may have results which will be of importance to the Association.

Members of the Association may remember that in the spring of 1953 a number of universities raised serious objections to the language of certain of the criteria on athletics which had been adopted by the Association at the Annual Meeting in the spring of 1952. As a result the Commission has appointed a new Committee on Athletics which is engaged in a re-study of the problems in this difficult and sensitive field.

The Commission on Colleges and Universities has also been engaged in evaluating its procedures in accrediting and in considering the general nature of its organization. The belief has been growing in the Commission that there is a need for revision of the present criteria used in accrediting and that a series of fundamental studies should be undertaken designed to throw light upon the educational problems colleges and universities are facing today and to provide a solid foundation for accrediting. There is also a general acceptance of the idea that the Commission should be concerned primarily with the improvement of institutions rather than merely with attempts to measure their present status. Finally, the Commission believes that there is need to provide for larger participation of member institutions in the actual work of evaluating the educational status of colleges and universities and in cooperative study of educational problems at the collegiate level. These problems have caused the Commission on Colleges and Universities to appoint a group of committees which are spending much time and effort in the study of the issues involved looking toward the improvement of its present practices in accrediting and in providing for larger participation of member institutions in the activities of the Commission. It seems probable that this program will lead to some reorganization of the structure of the Commission on Colleges and Universities as well as changes in its accrediting procedures.

The Commission on Secondary Schools has had a most fruitful year. The chairman of the state committees of the Commission held their annual conference on September 27–29, 1953, at the University of Wyoming, Laramie, Wyoming. This conference promoted an opportunity for the discussion of problems of mutual concern and resulted in specific recommendations to the Administrative Committee of the Commission. The Committee on Activities has been engaged in a study of the problems of recruitment of high school athletes by colleges looking toward the development of a sound set of principles to govern such activities.

The development of practices in the administration of dependents' schools in foreign lands which seemed to be contrary to good educational practice caused the Commission to send representatives to Europe and Japan to study the situation. As a result definite steps are being taken to reorganize the program under which these schools are conducted so that their educational activities will be directed by civilian

[2] NOTE: The Amendments were adopted and are incorporated in the Constitution as printed elsewhere in this issue.—EDITOR.

educators. It should be said, however, that the work with the dependents' schools is one of the most important activities of the Commission.

The Commission on Secondary Schools has also been concerned about some of its procedures. Consequently the Committee on Cooperation in Research has undertaken a study designed to obtain the judgment of member schools concerning the functions and procedures of the Commission.

In accordance with the functions it is to perform, the Commission on Research and Service has continued to carry on projects designed to improve education in secondary schools, colleges, and universities. The Committee on Teacher Education through its various subcommittees has conducted workshops, published bulletins and news letters, conducted conferences, and used other means to improve teacher education. The Committee on the School Library has been active in studying means for improving the education of school librarians and for making the school library a more effective educational instrument. The Committee on Military Information and Orientation has completed its work. Its report, published in the January, 1954, issue of the NORTH CENTRAL ASSOCIATION QUARTERLY, contains material of much value to secondary schools interested in aiding youth who face induction into the Armed Forces.

The Subcommittee on Experimental Units has completed two new units for use in high schools, *Politics and You* and *India and Pakistan*, and has revised the unit entitled *Why Taxes?* The Commission has also been engaged in developing a new proposal for a study of high school-college articulation.

Although much more could be said about the work and activities of the North Central Association during the past year, this brief review suggests that the Association has continued to exercise leadership in educational affairs. Many of the projects it has undertaken will continue through the coming year. One of the most significant aspects of the Association's activities is the effort to evaluate its functions and procedures for this is one means by which the Association may become a more effective leader in education.

# Proceedings of the Commission on Colleges and Universities

ANNUAL MEETING, MARCH 22–26, 1954

## I. REPORT OF THE COMMISSION

AT ITS MEETING on March 23 and 24 the Commission heard progress reports from the Committee on Planning, Committee on Reorganization of Accrediting Procedures, Committee on Professional Education, and the Committee on Athletics and commended the committees on the progress made in their respective areas.

A resolution was passed by the Commission instructing the Board of Review to arrange for a series of state conferences of the representatives of member institutions of higher education to discuss the proposals of the committees, these conferences to be held, if possible, by November, 1954.

Copies of the reports of the Committees on Planning, Reorganization of Accrediting Procedures, and Professional Education have been sent to the member higher institutions and additional copies are available in the office of the Secretary. A report of the Committee on Athletics will be distributed among the member higher institutions in the near future.

The Commission considered the applications of eleven institutions seeking accreditation. Its actions are taken on the basis of a report of a self-study of the institution, a report of examiners sent to visit the institution, and an interview held by the Board of Review with the chief administrative officer of the institution and the chairman of the examining committee.

The Commission recommended that the following institutions be accredited:

Augsburg College, Minneapolis, Minnesota
Eastern Oklahoma A. & M. College, Wilburton, Oklahoma
Harding College, Searcy, Arkansas
Quincy College, Quincy, Illinois
Viterbo College, La Crosse, Wisconsin

The Commission considered applications for approval of graduate programs of study from four member institutions. It recommended that the University of Arkansas, Fayetteville, Arkansas, be approved for the granting of the Doctor's degree.

It recommended that the following institutions be approved for the granting of the Master's degree:

Iowa State Teachers College, Cedar Falls, Iowa
National College of Education, Evanston, Illinois
Wisconsin State College, Superior, Wisconsin

These recommendations were approved by the Association on March 26, 1954.

## II. STATEMENT OF POLICY RELATIVE TO THE ACCREDITING OF INSTITUTIONS OF HIGHER EDUCATION[1]

### Introduction

This statement of policy defines certain principles that will be followed in accrediting institutions of higher education. It is stated in general terms and includes brief descriptions of those characteristics of an institution that will be examined as a basis of accreditment.

This statement of policy is supplemented by a manual which contains elaborations of the statements here given and detailed directions for the execution of the policy here set forth. Upon each important issue the *Manual* contains specific directions for the collection of information and such norms and criteria as will make possible a fair and intelligent evaluation of an institution.

### MEMBERSHIP

The North Central Association of Colleges and Secondary Schools will accredit and admit to membership as an institution of higher education a university, college, junior college, or institution of similar character that is judged to be of acceptable quality in matters later defined in this statement of principles. In the interpretation of this policy the liberty to integrate the whole or a part of a secondary school with a higher instituion will be permitted.

Eligibility for membership will be based upon the character of an institution as a whole, including all the units within its organization. In the case of units, such as professional schools, that fall within the areas of other accrediting agencies, the actions of such accrediting agencies will be taken into account; but the Association does not bind itself to accept the judgment of these agencies.

### PURPOSES OF ACCREDITING

The purposes of the Association in accrediting higher institutions are as follows:

1. To describe the characteristics of institutions worthy of public recognition as institutions of higher education
2. To guide prospective students in the choice of an institution of higher education that will meet their needs
3. To serve individual institutions as a guide in interinstitutional relationships, such as the transfer of students, the conduct of intercollegiate student activities, the placement of college graduates and the selection of college faculties
4. To assist secondary schools in the selection of teachers and in advising students as to a choice of institutions, and to promote in any other ways the co-ordination of secondary and higher education
5. To stimulate through its accrediting practices the improvement of higher education in the territory of the North Central Association

### BASES OF ACCREDITING

An institution will be judged for accreditment upon the basis of the total pattern it presents as an institution of higher education. While institutions will be judged in terms of each of the characteristics noted in this statement of policy, it is recognized that wide variations will appear in the degree of excellence attained. It is accepted as a principle of procedure that superiority in some characteristic may be regarded as compensating, to some extent, for deficiencies in other respects. The facilities and activities of an institution will be judged in terms of the purposes it seeks to serve. An institution is not held to a set of minimum standards,

[1] At the annual meeting of the Association in April, 1934, this statement of accrediting policy was unanimously adopted by the Association in lieu of the accrediting standards in use up to that time.

violation of any one of which jeopardizes its accreditation.

### ELIGIBLE INSTITUTIONS

To be considered by the Association an institution must be incorporated as a nonprofit corporation devoted primarily to educational purposes and[1] legally authorized to confer collegiate degrees, or to offer a definitely described portion of a curriculum leading to such a degree, or to offer cirriculums leading to an academic certificate. As a condition of eligibility an institution must include among its major functions the provision of general education as defined in the *Manual*. An approved institution is not barred from offering curriculums terminating at the end of one, two, or three years if they are taught at the level of collegiate instruction. The curriculum should presuppose the completion of a secondary-school curriculum as a condition for entrance to the institution, or secondary courses should be so integrated with the curriculum of the institution itself as to guarantee the educational progress of students to a definite stage of advancement beyond the completion of the usual secondary-school offering. Before an institution will be considered for accreditment, it must have been in operation long enough to make possible an evaluation of its program.

### INDIVIDUALITY OF INSTITUTIONS

In its accrediting procedures the Association intends, within the general patterns of higher education, to observe such principles as will preserve whatever desirable individual qualities member institutions may have. While it is necessary to emphasize certain characteristics that are recognized as basic, such as the competence of the faculty, the representative character of the curriculum, effective administration, standards of student accomplishment, and financial adequacy, it is regarded as of prime importance also to protect such institutional variations as appear to be educationally sound. Even in these basic matters it is clear that considerable divergence from average or optimum conditions may occur without perceptibly detracting from the essential educational worth of an institution. Uniformity in every detail of institutional policies and practices is believed to be not only unnecessary but undesirable. Well-conceived experiments aimed to improve educational processes are considered essential to the growth of higher institutions and will be encouraged.

### PUBLISHED LIST OF ACCREDITED INSTITUTIONS

The Association will publish one list of accredited institutions of higher education. Attached to the name of each institution in the list will be notations relative to such objective facts as are pertinent to a description of the characteristics of an institution.

### CONTINUING REVISION OF POLICY AND PROCEDURES

The effect of this program of accrediting upon the welfare of institutions is the vital matter in its formulation and adoption. Continuous study leading to adjustment and improvement is accepted as necessary to the full fruitage of the plan and will be considered an integral part of the regular accrediting activities of the Association. It shall be the policy of the Commission to study the operation of the principles given in this statement of policy and of the detailed procedures described in the *Manual*.

[1] The words "incorporated as a nonprofit corporation devoted primarily to educational purposes and" were added to the Statement of Policy at the annual meeting of the Association in April, 1937.

In pursuit of this policy there will be collected periodically from member institutions such information as will contribute to the procedures of accrediting and will reveal the changing character of these institutions. It shall be the duty of the Secretary, with the counsel of the Board of Review, to conduct biennially a study in one of the following three areas: (1) faculty competence, (2) library, (3) finance. Other areas may be studied as the Board of Review deems desirable, but furnishing of information for general studies outside the three areas mentioned shall be on a voluntary basis on the part of member institutions. The report forms shall be adapted to characteristics of the several types of institutions represented in the Association, and constructed in the simplest form consistent with usefulness.

## Criteria of Institutional Excellence

### I. PURPOSES AND CLIENTELE

Recognition will be given to the fact that the purposes of higher education are varied and that a particular institution may devote itself to a limited group of objectives and ignore others, except that no institution will be accredited that does not include among its major functions the provision of general education.

Every institution that applies for accreditment will offer a definition of its purposes that will include the following items:

1. A statement of its objectives in general education
2. A statement of the occupational objectives, if any, for which it offers training
3. A statement of its objectives in individual development of students, including health and physical competence

This statement of purposes must be accompanied by a statement of the institution's clientele showing the geographical area, the governmental unit, or the religious groups from which it draws students and from which financial support is derived.

The facilities and activities of an institution will be judged in terms of the purposes it seeks to serve.

### II. FACULTY

An institution should have a competent faculty, organized for effective service, and working under satisfactory conditions.

In determining the competence of the faculty, consideration will be given to the amount and kind of education that the individual members have received, to their experience in educational work and to their scholarship as evidenced by scholarly publications and contact with learned societies. Attention will be given to the faculty requirements implied by the purposes of the institution. The educational qualifications of faculties in colleges of similar type will be considered in judging the competence of a faculty.

Under faculty organization consideration will be given to the number of the faculty in ratio to the number of students, to representation of the teaching fields, to the training of instructors in their fields of instruction, to group organization of the faculty, to faculty meetings, and to faculty committees.

Under satisfactory working conditions consideration will be given to the following: salary status; tenure; instructional load; recruiting, selection, and appointment; aids to faculty growth; and provisions for leaves of absence, retirement, insurance, housing, and recreation and community life.

### III. CURRICULUM

The curriculum of an institution should contain the subject-matter offerings implied by its statement of objectives. These offerings will include

provisions for general education, advanced courses when the purposes of an institution require such offerings, and special courses appropriate to the specific objectives which the institution claims as among its functions.

The organization of the curriculum should be such as will best serve students of the type whose admission is implied by the declared purposes of the institution. Responsibility for the grouping of curriculum content, as by courses, departments, or divisions, will lie with institutions. The merit of a curriculum organization will be judged primarily by the manner in which it functions.

The curriculum of an institution will be regarded as effective only when the faculty includes instructors competent by reason of educational preparation to offer instruction in announced courses.

The institution should be able to show clearly that the curriculum as described in published statements is effectively administered in the case of individual students and that there is reasonable adherence to stated requirements in the awarding of degrees and certificates of progress.

### IV. INSTRUCTION

An institution will be expected to show a sympathetic concern for the quality of instruction offered students and to give evidence of efforts to make instruction effective. Consideration will be given to the emphasis placed by the institution upon teaching competence in the selection and promotion of teachers, to the manner in which young instructors are inducted into teaching activities, to the aids that are provided as stimuli to the growth of individual members of the staff, to the institution's concern for high scholarship in students, to its emphasis upon the adjustment of the curriculum and teaching procedures to the abilities and interests of students, to efforts to make such examinations as are given more reliable and more accurate measures of student accomplishment, and to the alertness of the faculty to the instructional needs of students. Familiarity of the administration and faculty with current discussions of instructional problems at the college level and with recent experimental studies of college problems are further evidences of institutional alertness to the need for good college teaching.

### V. LIBRARY

The library should provide the reading facilities needed to make the educational program effective, and there should be evidence that such facilities are appropriately used.

In estimating the adequacy of the library, attention will be given to the holdings of standard works of general and special reference, to the holdings of magazines and periodicals, and to the number and variety of books. The use of the library by students and by the faculty, library expenditures over a period of years, the salaries of the library staff, the qualifications of the staff, and the administrative practices relating to the library will all be considered in this connection.

### VI. STUDENT PERSONNEL SERVICE

The policy of an institution in admitting students should be determined, on the one hand, by the purposes of the institution and, on the other, by the abilities, interests, and previous preparation of applicants. An institution should admit only those students whose educational interests are in harmony with the purposes of the institution and whose abilities and previous preparation qualify them to pursue the studies to which they are admitted.

The student personnel service of an institution should assist students to

analyze and understand their problems and to adjust themselves to the life and work of the institution.

In evaluating the practices of an institution in the induction of students, attention will be given to the provision for preregistration guidance in cooperation with secondary schools, to the criteria used in the selection of students, to the administration of the stated entrance requirements, and to the arrangements for introducing new students to the life and work of the institution.

Consideration will be given to the means employed by an institution to assist students in the selection of courses and curriculums, in solving immediate academic problems, in furthering their scholastic development, and in making suitable vocational choices and preparation. Attention will also be given to the practices of an institution in counseling students about their health, their financial affairs, and their intimate personal affairs. The student's relation to extra-curriculum activities will also be studied. The practices of an institution in the provision and control of health services, in the housing and boarding of students, in the management of extra-curriculum activities, in the control of student conduct, and in financial assistance to students will be considered.

### VII. ADMINISTRATION

The administrative organization should be suitable for accomplishing the objectives of the institution. Adequate provision should be made for the performance of all administrative functions by a personnel competent in their respective lines of activity.

In evaluating the administration of an institution, the emphasis will be placed upon the manner in which the functions are performed rather than upon the organization or the personnel, although the suitability of the organization and the competence of the personnel cannot be ignored. Attention will be given to such matters as the constitution and activities of the board of control; the general system of administrative control; the administration of academic matters, such as curriculum, faculty personnel, and instruction; the business administration, including financial accounting, budgeting, purchasing, the collection of revenues, and the supervision of the finances of student activities; the administration of the physical plant; the management of invested funds, if any; the administration of the student personnel service; the administration of special educational activities, if any, such as summer session or extension services; and the system of records and reports.

### VIII. FINANCE

The institution should provide evidence of financial resources adequate for and effectively applied to the support of its educational program.

The items of information to be considered in determining the adequacy of the financial support are the expenditure per student for educational purposes,[1] the stability of the financing, as indicated by the amount of income per student from stable sources, and the avoidance of burdensome indebtedness; and the procedures in financial accounting and reporting. Necessary adjustments will be allowed for contributed services of instructors and administrative officers in Catholic institutions.

### IX. PHYSICAL PLANT

The physical plant, comprising

[1] A phrase relating to the dependence of an institution upon student fees was deleted from the Statement of Policy at the annual meeting of the Association in April, 1937.

grounds, buildings, and equipment, should be adequate for the efficient conduct of the educational program and should contribute effectively to the realization of the accepted objectives of the institution.

In judging the plant, consideration will be given to the adequacy and effectiveness of such features as site; general type of buildings; service systems; classrooms, laboratories, and other facilities appropriate to the special purposes of the institution; office facilities; library building; facilities for health service, recreation, and athletics; dormitories; auditoriums; assembly rooms; and the operation and care of the plant.

### X. INSTITUTIONAL STUDY

An institution should continuously study its policies and procedures with a view to their improvement and should provide evidence that such useful studies are regularly made.

Consideration will be given to the means used by the institution in the investigation of its own problems, to the nature of the problems selected for study, to the staff making studies, to the methods employed, to the attitude of the administration toward and the support given to such studies, and to the manner in which the results are made available to the faculty, the administrative staff, and the interested clientele. It is recognized that such studies may be of many sorts, ranging from small inquiries of immediate service value to elaborately conducted experimental investigations. They may deal with any phase of the work of an institution, such as administration, curriculum, student personnel service, instruction, or any other matter of immediate or remote concern to the institution. An institution will be requested to provide typed or printed copies of completed studies.

### XI. ATHLETICS

If the institution maintains a program of intercollegiate athletics, the same policies should prevail in regard to faculty, administration, and the management of students as are in force in connection with the other features of the institution.

In evaluating the athletic program, consideration will be given to the requirements for eligibility for participation; the distribution of scholarships, loan funds, grants of financial aid, and remunerative employment; the methods taken to safeguard the health of participants; the administrative organization; the financial control; and the competence of the staff.

## III. LIST OF ACCREDITED INSTITUTIONS OF HIGHER EDUCATION

July 1, 1954

*Explanation of dates.*—The dates listed are dates of membership. The first accredited list was published in 1913; no institution was accredited prior to that time.

A dash connecting two dates indicates continuous accreditation during the period specified, e.g., 1915–1919 means continuous accreditation from 1915 to 1919 inclusive. A date followed by a dash indicates continuous accreditation to and including the current year. A semicolon indicates that the institution was on the list for the year or years specified but that it was not on the list for the following year, unless the next entry shows a change of classification for the latter years.

*Designation of extent of program.*—The symbol (M) or (D) after the name of an institution indicates that the institution offers a graduate program

leading to the Master's or Doctor's degree, respectively, and that the accreditation of the institution includes its graduate work. Those institutions which are listed neither as junior colleges nor as having graduate programs are Bachelor's degree-granting institutions or institutions with graduate programs that have not yet been accredited.

# Proceedings of the Commission on Secondary Schools

## I. REPORT OF THE COMMISSION

THE ANNUAL MEETING of the Commission on Secondary Schools of the North Central Association of Colleges and Secondary Schools opened with a meeting of the Administrative Committee at the Palmer House, in Chicago, on Sunday, March 21, 1954, at 7:00 P.M. Upon the recommendation of the nineteen State Chairmen, the meeting of the Chairmen and the Administrative Committee, which had customarily consisted of one meeting, was extended to include one whole day of two meetings. The first was held at 9:00 A.M. and the second at 1:30 P.M. on Monday, March 22. Much of the time was spent in discussing problems common to all and arriving at satisfactory solutions of those problems.

Chairman Lowell B. Fisher had made extensive arrangements for caring for members of reviewing committees, including a card file of individuals who had indicated a desire to work on reviewing committees and name-tags for their lapels. This helped to do away with much of the confusion which ordinarily obtains in getting individuals assigned to committees and getting work started.

Promptly at 9:00 A.M. on Tuesday, March 23, a total of 422 individuals sat down to review the reports of 3,277 high schools. By the end of the day, the work of the reviewing committees was completed. At 4:00 P.M., the chairmen, assistant chairmen, and secretaries of the reviewing committees met with the nineteen State Chairmen to report the results of the day's work and to permit any State Chairman who might question the decision of the Reviewing Committee relative to an individual school within his state, to raise questions, seek information concerning the reasons for the recommendation the committee proposed, and, so far as possible, clear up all questions prior to the presentation of the recommendations of the Reviewing Committees to the Commission at its final business session. This procedure made it possible to discuss, clarify, and thus avoid serious differences of opinion. In the final analysis, it also saved time. When the reports of the various reviewing chairmen were completed, the State Chairmen expressed themselves as satisfied with the finding of the reviewing committees and expressed to them their thanks for a big job well done.

The first business meeting of the Commission was held on Wednesday, March 24, at 9:30 A.M. with Chairman Lowell B. Fisher presiding. At this time the Secretary presented his report, which by custom has become a brief review of the activities of the Administrative Committee since the last annual meeting.

Brief reports were made by the following individuals for their respective committees:

Edgar G. Johnston, *American Dependents' Schools*
Stephen A. Romine, *Cooperating Committee on Research*

Otto Hughes, *Activities Committee*
Alva J. Gibson, *Report Forms*
Lowell B. Fisher, *The Study of USAFI for the Department of Defense*
Walter L. Cooper, *Subcommittee on School Library Study.*

The following members of the Armed Forces who were attending the meeting and who were at the speaker's table were introduced and each responded with a few remarks:

Lt. Col. Robert M. Mouk, Assistant Chief, Budget and Manpower Branch, The Adjutant General's Office, Washington, D. C.

Lt. John L. Steele, GS, Personnel Staff Officer, Hqs, United States Army, Europe, Personnel Services Branch, G-1, APO 403, c/o postmaster, N. Y.

Dr. Farnham G. Pope, Information and Education Branch, Chief, Dependents' Schools, Directorate of Military Personnel, Department of the Air Force, Washington, D. C.

George Y. Wilkins, Bureau of Naval Personnel, Information and Education Section, Head, Overseas Dependents' Schooling Unit, Department of the Navy, Washington, D. C.

Herbert J. Moss, Office of the Assistant Secretary, Department of the Army, Washington, D. C.

Dr. Ernest Whitworth, Director, Commission on Accreditation of Service Experiences of the American Council on Education, Washington 6, D. C.

Previous to the meeting the Chairman had appointed a Nominating Committee composed of the following individuals:

Morgan R. Owens, *State Department of Education, Little Rock, Arkansas*
E. H. Fixley, *University of New Mexico, Albuquerque, New Mexico*
Richard K. Klein, *State Department of Education, Bismarck, North Dakota*

The report of the Nominating Committee was called for. Mr. Owens, reporting for the Committee, placed the following names in nomination:

For Chairman of the Commission—Floyd A. Miller, *State Department of Public Instruction, Lincoln, Nebraska*

For member of the Administrative Committee—G. A. Beck, *Principal of Central High School, Duluth, Minnesota.*

For the Class of 1957:

Jack Neely, *Principal, Man High School, Man, West Virginia*
O. K. Garretson, *University of Arizona, Tucson, Arizona*
W. H. Taylor, *Principal, Classen High School, Oklahoma City, Oklahoma*
E. O. Tandberg, *Superintendent of Schools, Garretson, South Dakota*
J. A. Mason, *Principal of Niles Township High School, Skokie, Illinois*
Howard Latta, *Principal, Webster Groves High School, Webster Groves, Missouri*

The report of the Committee was accepted and the Chairman then called for nominations from the floor. None being offered, it was moved and seconded that the individuals named by the nominating committee be elected to the respective offices. Motion carried unanimously.

The meeting adjourned at 12:00 Noon.

The final business meeting of the Commission was held at 2:00 P.M. on Wednesday.

Mr. Fletcher Miller, Acting Superintendent of Jefferson County Schools and Mr. Jay D. Dupree, member of the board of education of the same district, ap-

peared before the Commission, protesting the action of the Colorado State Committee and the Reviewing Committee on schools to be dropped. Each was permitted to make a statement and to answer questions, as were Stephen A. Romine, Chairman of the Colorado State Committee and Kenneth Anderson, Chairman of the Reviewing Committee. After discussion by the Commission, it was voted unanimously to uphold the recommendations of the Colorado State Committee and the Reviewing Committee, it being understood that these school authorities would have an opportunity, following regular procedures, to appeal the action to the Executive Committee.

The Reviewing Committees reported to the Commission at this time and made the following recommendations, which were accepted unanimously:

| | |
|---|---|
| For unqualified approval | 2,319 schools |
| To be advised | 765 schools |
| To be warned | 120 schools |
| Schools dropped or withdrawn | 23 schools |
| New schools to be added | 73 schools |

Total membership of secondary schools in the Association now stands at 3,277.

Chairman Fisher introduced Chairman-elect Floyd A. Miller and handed him the gavel of authority. After a few remarks, Chairman Miller adjourned the meeting at 4:10 P.M.

## V. POLICIES, REGULATIONS, AND CRITERIA FOR THE APPROVAL OF SECONDARY SCHOOLS

### Guiding Principles

I. An institution should be judged upon the basis of the total pattern it presents as an institution of its type. While it seems necessary that institutions be judged in terms of particular characteristics, it should be recognized that wide variations will appear in the degree of success achieved.

II. It should be accepted as a principle of procedure that deficiency in one field may be compensated for by strength in other fields—no school should be denied accreditation because it fails to meet a specific standard, if its total pattern of achievement is good.

III. A school should be judged, in so far as is possible, in terms of its own philosophy and the purpose which it serves in its own community. The fact should be recognized that individual differences exist among schools and among communities.

IV. Criteria should be flexible, and of a type that can readily adjust themselves to changing conditions.

V. Objective criteria should be based upon a sufficient amount of research and experimentation to establish their validity as measuring instruments.

VI. While it seems desirable that criteria regard as basic certain characteristics, such as faculty preparation, the intellectual and moral tone of a school, the nature of the school plant, the adequacy of equipment and supplies, the quality of the school library and library service, the condition of the records, the policies of the board of education, the financial status, the teaching load, and the educational program, it should be recognized that considerable divergence from normal standards may occur in one of these characteristics without greatly detracting from the educational merits of an institution. Uniformity in every detail stifles educational experimentation and is not only unnecessary but undesirable.

VII. Criteria, to be of maximum value, should be stimulating and conducive to educational growth; they should be instruments for continuous self-evaluation and should provide the incentive to strive constantly toward higher goals of achievement.

### Policies of the Commission on Secondary Schools

#### POLICY I

A school which has submitted its annual report to the State Committee which is in the highest class of schools as officially listed by the properly constituted educational authorities of the state and which has been approved continuously for five years shall not be dropped without a year's warning except by a three-fourths vote of the members of the Commission present. A school which has not been approved continuously for five years may be dropped without warning.

#### POLICY II

It is the policy of the Commission to recommend the removal from the approved list of the Association of any school which, after a year's warning, continues to violate the same Regulation or Criterion which was violated the previous year. Upon the recommendation of the State Committee, however, this policy may be waived by a three-fourths vote of the Commission members present.

State Committees are encouraged to advise a school which has been warned for violation of a Regulation or a Criterion to submit to an evalua-

tion, using the *Evaluative Criteria*.[1] This evaluation is to be carried out when, in the opinion of the State Committee, it will assist in improving the condition for which the school was warned, or in explaining the extenuating circumstances which may justify a second warning, or even the discontinuance of the warning.

POLICY III

Secondary schools are approved for an indefinite period. All schools on the approved list, however, shall submit such reports as the Commission may require. The certificate showing that a school is approved by the Association is valid as long as the school meets the conditions for approval as defined by the commission on Secondary Schools and approved by the Association.

POLICY IV

Credits acquired through summer session work, extension courses, correspondence courses, or state examinations will be accepted by the Association as counting toward the preparation of the teacher, if such credits are accepted by an approved institution of higher education.

The Association recognizes that credit established in accordance with the recommendations in *A Guide to the Evaluation of Educational Experiences in the Armed Services*[2] is sound. Such credit may be counted as a part of the preparation of the teacher, when accepted by an approved institution of higher education.

POLICY V

The Chairman of the State Committee is the official agent of communication between the approved schools of the state and the Secretary of the Commission on Secondary Schools. He is responsible to the Commission for the distribution, collection, and filing of all reports, and for such other duties as the Association may direct.

The Chairman of the State Committee shall be either the Committee representative of the State University or of the State Department of Education and shall be selected by majority vote of the State Committee subject to the approval of the Executive Committee. He shall be elected for a term of four years, and shall be eligible to succeed himself, but may continue in office only so long as he is a member of the State Committee.

In the event of a vacancy in the chairmanship during the term of office of an incumbent, the State Committee shall elect a chairman to complete the unexpired term. The meeting for this purpose will be called by the secondary school representative having the longest tenure on the committee.

POLICY VI

The interim authority for interpreting Policies, Regulations, and Criteria for the Approval of Secondary Schools is the Secretary of the Commission on Secondary Schools.

POLICY VII

It is the policy of the Association to warn high schools for violation of the conditions for eligibility to the approved list of the Association and to drop from this list any high school which violates the same Regulation or Criterion during consecutive years. High schools may also be warned or dropped whenever it becomes evident that they frequently violate conditions for eligibility to the approved list. In the case of a minor violation, the Association may instruct the State Committee to advise the school concerned. It is the policy of the Association not to take an action which is different from that recommended by the State Committee

without first notifying the committee of the state concerned.

State Committees are encouraged to advise a school which has been warned for violation of a Regulation or a Criterion to submit to an evaluation, using the *Evaluative Criteria*. (See Policy II.)

POLICY VIII

In the case of individual schools of any state, reasonable deviations from Regulations and Criteria may be accepted by the Commission and approved by the Association when recommended by the State Committee. Such recommendations must be supported by substantial evidence showing that these deviations are justifiable.

No school should be denied approval if it fails to meet fully all Criteria and Regulations, provided its total educational pattern is good, as revealed by the results of a competent survey or other evidence. Policy VIII also applies to new schools seeking admission. State Committees are justified in expecting closer adherence to published regulations and criteria in the case of new schools. Special attention should be given to the reports of State Committees which have used the *Evaluative Criteria* as one of the steps to be taken by new schools in making their application for admission. It is recommended that State Committees ask each prospective new school to carry out at least a self evaluation using the *Evaluative Criteria*. Such schools should be encouraged to use the full Cooperative Study procedure, supplemented by a review of the self evaluation by a visiting committee or by the State Committee.

The conditions for eligibility to the approved list of member schools of the Association are included under two separate classifications: Regulations and Criteria.

## Regulations

Regulations are those yardsticks which serve to assist schools which are members of the Association with definite guidance as to the necessary minima to be observed. In other words, regulations are floors below which there seems to be agreement that schools may not fall and still be of the type that should be considered good schools according to the Association's Criteria.

REGULATION I

*The Annual Report Blank*

The Association is under no obligation to consider a school for unqualified approval unless the annual report blanks have been properly and completely filled out and placed on file with the State Chairman on the dates determined by the Commission.

REGULATION II

*Organization of the School*

A secondary school shall base its rereport on all grades included in its organization.[3]

REGULATION III

*Qualifications of Staff Members*[4]

*A. Instructional Staff*

1. *General Preparation.* a. All members of the instructional staff possess a Bachelor's degree from an institution of higher education approved by the North Central Association of Colleges and Secondary Schools or from an institution of equal standing. (Exceptions may be made when recommended by the State Committee in the case of teachers of trades, if these teachers are legally qualified to teach in the state and have had the apprenticeship training required in their respective trades.)

b. Graduates of colleges not recognized by the North Central Association or by any other regional accrediting agency may become eligible to teach in a secondary school accredited by the

[3] A change in reporting the organization of a school shall be approved by the State Committee.

[4] Except where specifically stated (as in the case of library personnel), requirements pertaining to staff preparation are not retroactive and do not invalidate the qualification of a staff member who was fully qualified under the standards applicable at the time of his appointment to his present position.

Association by being admitted to graduate standing in an institution of higher education accredited by the Association or by any other regional accrediting agency, and by completing successfully not less than six semester hours of graduate work. This part of the Regulation is not to apply to graduates of non-accredited colleges who desire to teach in the state in which they were graduated, when approved individually in accordance with the policy of the State Committee.

c. Teachers in school systems having two or more high schools, who are transferred by the administrative officer from one school to another, and who, though not fully qualified, have been accepted previously by the Association, when they teach the same subjects in a new school as they were teaching in their former position, shall be accepted by the Association as properly qualified teachers, provided that the system encourages teachers who are not fully qualified to continue their educational preparation, and that evidence exists that progress is being made.[5]

2. *Professional Preparation.* The minimum professional preparation of individual members of the instructional staff is fifteen semester hours of education. In the case of a teacher whose professional preparation consists of less than fifteen semester hours, the State Committee shall have power to waive this Regulation if, in its judgment, the teacher is otherwise highly qualified and is doing clearly superior work.

3. *Preparation in Teaching Areas.* a. Adequate preparation in teaching fields and areas is defined as that which meets the legal requirements of the state in which the school is located and also any special requirements set up by legally constituted educational authorities of the state, provided, however, that the minimum preparation is fifteen semester hours at the college level in any one of the following areas: language arts, a foreign language, social studies, science, mathematics, business, health and physical education, music, art, home economics, agriculture, and industrial arts, and adequate preparation in each subject taught.[6] In the case of a teacher who devotes a minor fraction of his time to the teaching of a particular subject, a reasonable deviation from the minimum preparation may be accepted when approved by the state Committee.

b. In the case of unified courses which draw their subject matter from two or more teaching fields, the minimum preparation expected will be twenty semester hours on the college level, appropriately distributed among the teaching fields concerned.

c. Each State Committee will submit to the Secretary of the Commission on Secondary Schools the requirements of the properly constituted educational authorities of the state pertaining to the preparation of teachers in subject fields and areas.

4. *Records of Teachers' Preparation.* An official transcript or a certified copy of the college preparation of each teacher is kept on file in the office of the administrative head of the school or school system. All information which pertains to the preparation of teachers is secured from such official records. An official transcript is the institutional credit record signed by the registering officer of the higher institution certifying the credits. Its submission to the State Chairman for evaluation may be

[5] In the case of church schools, "school system" is taken to mean a group of schools under the central administrative control of a particular religious order or diocesan superintendent.

[6] Deductions in mathematics or in any one foreign language may be allowed to the extent of two semester hours for each unit earned in high school, not to exceed a total deduction of six semester hours.

required. A certified copy of the transcript may be accepted.

B. *Library Staff*[7]

1. *The Librarian.* a. In schools with an enrollment of 500 or more pupils, the librarian is a full-time librarian. In schools with an enrollment of 200–499 pupils, the librarian may be a full-time librarian, a study-hall librarian, or a teacher-librarian; at least half the time of a teacher-librarian is devoted to the library. In schools with an enrollment of less than 200 pupils, at least two periods a day of the teacher-librarian's time are devoted to the library.

b. The librarian meets the requirements of Regulation IIIA-1 and 2. In a school with an enrollment of 500 or more pupils, the librarian has completed a minimum of 24 semester hours of library science. In a school with an enrollment of 200–499 pupils, the librarian has completed a minimum of 15 semester hours of library science. In a school with an enrollment of less than 200 pupils, the librarian has completed a minimum of 6 semester hours in library science.

c. The work in library science includes such courses as the following: school library organization and administration, cataloging and classification, book selection and acquisition with emphasis on the reading and needs of adolescents, reference material, and general bibliography.

2. *Assistants.* Provision is made for an adequate number of assistants to the librarian, either as assistant-librarians or as pupil-librarians.

C. *Other Professional Staff* (physician, dentist, nurse, psychiatrist, psychologist)

Members of the non-instructional professional staff meet the requirements of the state in which the school is located.

D. *Clerical Staff*

Adequate clerical assistance is provided. The qualifications of such personnel include, as a minimum, high school graduation and preparation in office practice.

E. *Custodial Staff*

The members of the custodial staff meet the state requirements pertaining to their training and employment.

REGULATION IV

*Administrative Staff*

A. *Principal*

The principal (or the administrative head of the secondary school) has had at least two years of teaching experience and possesses as a minimum a Master's degree from an institution of higher education qualified to offer graduate work. His preparation in school administration and supervision includes an appropriate distribution of graduate work covering those phases of the school administrator's work which are professional in character, such as secondary school administration, curriculum making, the supervision of instruction, methods of teaching, philosophy of education, history of education, pupil activities, guidance, health and safety, vocational education, personnel records and reports, and school finance. Anyone who holds the title of principal meets the foregoing requirements.

B. *Superintendent*

The superintendent of schools or the administrative head of the school system has the teaching experience and professional preparation described in Regulation IVA.

[7] Regulation IIIB shall be in force upon adoption, but exceptions may be made by the State Committee until the school year 1955–56.

C. *Supervisory and Guidance Assistants*

Any member of the faculty who assists the administrative head of the school in the supervision of instruction possesses, as a minimum, the requirements specified in Regulation IIIA-1 and 2, and, in addition, an appropriate distribution of graduate work in such fields as the supervision of instruction in the secondary school, personnel and guidance, methods of teaching, educational psychology, and philosophy of education.

REGULATION V

*Length of School Year*

The minimum length of the school year is thirty-six weeks, 180 days, with a minimum of 172 days of classes actually in session.

REGULATION VI

*Length of Class Period*

A. A school may elect to conduct classes on the short period basis, the long period basis, or a combination of the two. The minimum length of the short class period for one unit of credit is defined as 40 minutes, exclusive of all time used in the changing of classes or teachers, five times a week for thirty-six weeks, or 180 days. Under this plan, two class periods necessitating little or no preparation outside of class are considered as equivalent to one period of prepared class work.

B. The length of the laboratory or long class period, for one unit of credit and for the purposes of this Regulation, is defined as a minimum of 55 minutes exclusive of all time used for the changing of classes or teachers. Under the long period plan, directed study may be substituted for the outside preparation required for the short period class. Under the short or the long period plan, however, a reasonable amount of outside or independent study by pupils in accordance with their abilities is encouraged.

REGULATION VII

*Requirements for Graduation*

A. A three-year senior high school requires a minimum of twelve units, or 120 semester hours, for graduation. Four-year senior high schools require a minimum of sixteen units, or 160 semester hours, for graduation. Six-year high schools require a minimum of twelve units, or 120 semester hours, earned in the upper three years. (See Regulation II.)

B. A semester hour is defined as the amount of credit granted for the completion of a course covering one semester and consisting of one class period weekly, as defined in Regulation VI.

C. In order to permit variation from the foregoing definitions of a quantitative unit of credit based upon time element and to stimulate improved standards of scholarship, the school may elect to grant credit on a qualitative basis. School authorities, therefore, are encouraged to determine credit through the use of approved end-of-course tests. These tests measure the achievement ordinarily required for credit in a one or two semester course. Any supplementary evidence which may be considered necessary or desirable to establish the validity of such credit may be required.

D. State Committees are empowered to approve this plan for those schools wishing to adopt it, provided the school has personnel trained for the administration of such testing program. The scores of such tests may be used for the transfer of credit to other schools and to colleges.

E. Tests may be used to classify individuals entering school with educational experience for which regular transcripts of credit are not available.

Each individual thus tested is placed in the educational courses best suited to his needs.

REGULATION VIII

*Size of School*

An approved school employs, as a minimum, a number of teachers whose full-time equivalency is one in excess of the number of years in the organization of the school.

REGULATION IX

*Pupil Load*

In order to protect the social as well as the intellectual maturity of the pupil, it is advisable that he have four years experience in a four-year high school or three years experience in a three-year high school in order to graduate.[8] In exceptional cases, pupils may be allowed to graduate in less than the time specified above, provided that adequate guidance procedures have been followed.

REGULATION X

*Teaching Load*

In determining the teaching load, consideration is given to the following components: the number of periods of class teaching, the number of different preparations, study hall duty, class size, total number of pupils taught daily, the demands made in the way of any guidance and supervisory activities, and the duties involved in the sponsorship of pupil activities. Due allowance is made in computing the teacher load for special assignments to committee work whose purpose is to improve any phase of the school program. The desirable maximum equivalency of a combination of such duties is six periods daily for the short period schedule, and five periods daily for the lengthened period schedule. A teaching load in excess of seven periods daily, including study hall assignments, for the short period schedule and six periods daily, including study hall assignments, for the lengthened period schedule is considered a violation of this Regulation. The total teaching load is not excessive and is distributed equitably among the teaching staff.[9]

REGULATION XI

*Library Expenditures*

A. That part of the annual secondary school budget devoted to library expenditures varies according to the size of the school; the smaller the school, the greater the pupil per capita expenditure. A minimum amount of $200.00 is expended annually in each secondary school for the purchase of library books, periodicals, newspapers, pamphlets, vertical file materials, and supplies.

B. The budget is planned in accordance with the library needs as shown by the annual library inventory and in accordance with the school's objectives for library service. The following scale of annual expenditures is recommended as a guide:

1. Schools with an enrollment of 1000 or more pupils expend approximately 50 cents per pupil.
2. Schools with an enrollment of 500 to 999 pupils expend approximately 75 cents per pupil.
3. Schools with an enrollment of 200 to 499 pupils expend approximately $1.00 per pupil.
4. Schools with an enrollment of less

[8] If the school has a summer session, the time spent may be counted as a proportionate part of the school year.

[9] An average enrollment in the school in excess of thirty pupils per teacher is considered as a violation of this Regulation. For the purpose of interpreting this Regulation, the principal, vice-principals, study hall teachers, vocational advisers, librarians, and other supervisory officers may be counted as teachers for such portion of their time as they devote to the management of the high school.

than 200 pupils expend not less than $200.00.

### REGULATION XII

*Financial Support*

The financial condition of the school district or governing body is such that it is possible for the school to meet the conditions for accreditation and to maintain reasonably well standards of excellence as indicated in the Criteria.

### CRITERIA

The standards of excellence which a school holding membership in the North Central Association is expected to maintain are based on statements in the *Evaluative Criteria*, as developed by the Cooperative Study of Secondary School Standards.

### CRITERION I

*Philosophy and Objectives*

A. *Pupil Population and School Community*

Since the school exists for the educational needs of its constituency, it should be familiar with the distinctive characteristics of the community, such as its sociological composition, its social, economic, religious, recreational and educational institutions and agencies, and the educational needs of both youth and adults. Since the local community is also a part of the state, nation, and world, the school must also be concerned with an understanding of the social, political, economic, and other forces of these larger communities and with the development of the ability of all peoples to live together in one world. A school, therefore, should develop its philosophy and objectives from an analysis of such social factors.

B. *Philosophy of the School*

Each school should be free to determine its philosophy to the extent that it promotes the principles and spirit of American democracy. The statement of philosophy should be written, implemented by a specific statement of objectives, and manifested in the educational program of the school.

### CRITERION II

*Educational Program*

A. *Basic Principles*

1. The educational program of the school is concerned with more than the accumulation of knowledge, development of skills, and improvement of understandings. The development of interest, tastes, appreciations, ideals, and attitudes, and the functioning of all these elements in a democratic society should be included in the educational program.

2. An educational program which is concerned only with preparation for college can no longer be considered an adequate offering for a school, although preparation for college should continue to be one function of secondary education. The program should provide for the interests, needs, and abilities of all pupils as well as for the requirements of the community and the public supporting the school.

3. The evaluation of an educational program should be made in terms of the curriculum and courses of study, pupil activities, the library, guidance, instruction, and outcomes.

B. *Curriculum*

1. The curriculum should be chiefly concerned with the orientation, guidance, instruction, and participation of youth in those significant areas of living for which education should supplement the work of other social institutions.

2. Constant adaptation and development of the curriculum should be a cooperative enterprise engaging all staff

members, carried on under competent leadership, and using all available resources. Carefully conducted and supervised experimentation for curriculum development is desirable.

C. *Pupil Activity Program*

The pupil activity program should aim to develop desirable social traits and behavior patterns in an environment favorable to their growth. Special importance should be attached to provision for pupil participation through student councils or similar organizations in the administration of those school functions which especially concern the interest and welfare of pupils. The activity program should not only provide opportunity for developing leadership ability but should stimulate active participation of all pupils in appropriate school organizations and community activities.

D. *Library Service*

1. The library is easily accessible to pupils, adequate in size, and attractive in appearance.

2. Adequate provisions for the school library should include the following: a. A well-educated, efficient librarian; b. books and periodicals to supply the needs for reference, research, and cultural and inspirational reading; c. provision for keeping all materials fully catalogued and well organized; d. a budget which provides adequately for the maintenance and improvement of the library; e. encouragement of pupils in the development of the habit of reading and enjoying books and periodicals of good quality and real value; f. continuous and systematic use of the library by teachers.

E. *Guidance Service*

Guidance, as applied to the secondary school, should be thought of as a service designed to give systematic aid to pupils in making adjustments to various types of problems which they must meet—*educational, vocational, health, moral, social, civic* and *personal.* Guidance activities should be organized into a definite program in which each staff member is a responsible participant. Where counselors are available, they should be responsible not only for specific activities but for stimulating and assisting teachers in their guidance activities.

F. *Instruction*

1. In the instructional program evidence should be found of: a. goals or objectives appropriate to the degree of development of pupils and in keeping with the purposes of the school; b. the selection and use of varied types of teaching and learning materials and experiences; c. the adjustment of method and organization to conditions and needs of pupils as a group and as individuals; d. the use of every legitimate means available in the evaluation of progress and quality of learning; e. a personal relationship of confidence, respect, and helpfulness between teachers and pupils, resulting in similar relationships between school and community; f. provision for all desirable types of learnings; g. definite and adequate learning by pupils as an outcome.

2. The efficiency of instruction, the acquired habits of thought and study, the general intellectual and moral tone of a school, and the cooperative attitude of the community are paramount factors. Only schools that rank well in these particulars are considered eligible for the list of schools approved by the Association.

G. *Evaluation of Outcomes*

1. In the educational program of a good secondary school, major concern should be given to attaining desirable outcomes and to the various kinds of

evidence indicating that such outcomes are being realized.

2. The results of the learning process should include: a. factual information or knowledge; b. meaning and understanding; c. abilities to do—knowledge and understanding combined with skill; d. desirable attitudes—scientific, social, moral, and others; e. worthy ideals, purposes, appreciations, and interests; and f. resultant intelligent participation in general life activities.

### CRITERION III

### *School Staff*

A. *Instructional Staff*

1. The staff should be a group of individually competent persons, organized into a cooperative body, having common purposes and motivated by the philosophy and objectives of the school. Diversity of preparation and viewpoints is desirable for a well-rounded staff, but its members should have the ability and the desire to work together, cheerfully, harmoniously, and efficiently for the good of the school and its pupils. Each member of such a staff should give evidence of awareness and understanding of educational problems and of *continuous professional growth.*

2. The number of staff members should be adequate for the curriculum offered, the school's enrollment, and the special needs of the pupils and the community. The teaching load and the total working load should be such as not to endanger the special needs of pupils.

3. Each staff member should have broad, general scholarship, thorough preparation in his special field, professional competence, and reasonable social development. In the selection of individual staff members, attention should be given to teaching ability, personality, health, and character. In evaluating the adequacy of the general preparation of the instructional staff, State Committees will take into consideration the extent to which the staff as a whole has completed work beyond the Bachelor's degree, the kind and distribution of college courses taken, the recency of their completion, and other evidences of professional growth.

4. Teachers should receive salaries adequate to insure a living standard comparable with the social demands on the profession and the worth of their service, as well as to provide security for old age.

B. *Librarian*

The library staff has a broad, general education, a good understanding of the school's philosophy of education and of its educational program, and some successful teaching experience. The staff has the ability to work effectively with teachers in finding and using suitable library materials and aids in teaching and learning, to work agreeably and effectively with pupils, and to teach them to find and use library material readily and effectively.

C. *Other Professional Staff*

The services of such personnel as physician, dentist, nurse, psychiatrist, psychologist, speech correctionist and hearing therapist are desirable and should be adequate to the needs of the school.

D. *Clerical Staff*

The clerical assistance necessary for an effective program of instruction, administration, and supervision should be provided.

E. *Custodial Staff*

The number of custodial staff members should be adequate to keep the school plant in sanitary and efficient operation. They should be trustworthy, resourceful, and cooperative.

F. *Health Examination*

It is recommended that a health examination be given to every new employee and periodically to every staff employee.

CRITERION IV

*Administration and Supervision*[10]

A. *The Board of Education*

Responsibility for determining the general policies of the school system is entrusted to a governing board, hereafter designated as the board of education. The board functions only when in official session; at other times its members have no authority in school matters, except as specifically authorized by the board. The administrative head of the schools is the chief executive officer of the board of education. Subject to the approval of the board of education, the administrative head is responsible for the selection and assignment of all school employees, the business management of the schools including school plant and equipment, the administration and supervision of the educational program, and the program of public relations. These duties necessitate organization of resources, both material and personal; delegation of duties and authority; and supervision of all delegated tasks and of all individuals to whom authority and responsibility are assigned. The better the administrative personnel, the more efficient will be the organization and management and the greater the probability of the successful attainment of the school's objectives, provided the personnel is always mindful of the primary function of the school—the development of its pupils. Success should be measured in terms of results, not of machinery.

B. *Policies of the Board of Education*

1. The policies of the board of education are such as to encourage a maximum of educational growth and development. The board of education has a published statement of policy.

2. The policies of the board of education are such as to attract and retain the services of well-qualified and competent staff members and a well-trained school administrator who is capable of providing effective educational leadership. It is the policy of the board under which an accredited high school operates to employ, promote, demote, and discharge staff members and other employees only upon the recommendation of the administrative head of the school system.

3. No employee is dismissed during the term of a contract or refused reemployment except at an official meeting of the board of education. The minutes of such a meeting clearly indicate all actions taken by the board. Employees who are to be dismissed or refused reemployment are given reasons for the action taken by the board of education and are given an opportunity for a hearing before official action is taken.

4. The administrative head of the school system attends all meetings of the board of education except that part of a meeting when his own employment is under consideration.

5. The board of education deals with staff members and other school employees only through the administrative head of the school system.

6. The administrative head of the school system is held responsible for the board of education for submitting a carefully planned budget and for the expenditure of money in accordance with the budget adopted. He keeps those members of the staff who have

[10] In the case of private schools or church schools, by "Board of Education" is to be understood the individual or group performing the functions of the board of education which are considered in Criterion IV.

responsibility for the proper expenditure of school funds informed as to the balances remaining in that part of the budget which relates to their departments.

7. The administrative head of the school system should share with the controlling board responsibility for establishing and maintaining desirable relations with the school's public. Therefore the supporting public should be informed regarding the policies, program, objectives, activities, and plans for the future of the school so that the support of the public be assured for the school's undertakings. There should always be a sympathetic and understanding relationship between the school and its administration on the one hand and its public on the other.

C. *Cooperative Relationships*

The working relationships between the board of education and the administrative head of the system, between the administrative head of the system and the principal of the secondary school, and between principal and staff are such as to insure successful and effective administration. Administrative procedures should be carried on by democratic processes which recognize the abilities and contributions of staff members.

D. *Administration*

1. The administration of the school is such as to insure a well-organized and well-managed school, effectively and intelligently supervised, and meeting the needs and interests of the pupils and of the community. Effectiveness of organization, permanency of tenure of all staff members, as shown by the history of the school, and the attitude and support of the community are matters which will be taken into consideration in determining whether the school is eligible for accrediting.

2. Interference with the administration of the high school by individuals or organized groups either inside or outside the school, when such interference is likely to result in a lowering of the effectiveness of the educational program, will be considered sufficient grounds for an official visit and inquiry into the condition of the school.

E. *Supervision*

Supervision includes the improvement of every phase of the educational program, such as the organization of programs of studies, the revision of curricula, the instructional procedures, the pupil activity program, and the noninstructional activities of staff members. The administrator directly in charge of a secondary school should have ample time during the school day for the administration and supervision of his school.

F. *Administration of the Activity Program*

A secondary school should not participate in any district, state, interstate, or regional athletic, music, commercial, speech, or other contest, tournament, congress, or assemblage involving the participation of more than two schools, except those approved by the State Committee, or by that organization recognized by the State Committee as constituting the highest authority for the regulation and control of such activities. It should be the responsibility of the State Committee to furnish member schools with a list of approved contests, tournaments, congresses, and assemblages. The State Committee should give prompt action on requests for the approval of activities.

G. *System of Records and Reports*

A school should maintain a type of personnel and record system of such

nature that it can provide any of the data asked for in the Criteria.

CRITERION V

*School Plant, Equipment and Supplies*

A. *Building and Site*

The school plant should be flexible, adequate in size, and so planned as to facilitate the offering of a modern program of secondary education that is suited to the needs and interests of the pupils and of the community. When a new plant is being planned, or an existing building is to be enlarged or remodeled, plans should contemplate meeting future as well as present needs. The building should be attractive and appropriate in design and should assure the safety and health of its occupants. The site should be large enough to provide ample playground space and should be attractively landscaped.

B. *Sanitation*

Janitorial service, lighting, heating, ventilation, water supply and drinking fountains, lavatories and toilets, wardrobes and lockers, school furniture, and location of the classrooms, shops, laboratory, and library should be such as to insure hygienic conditions for pupils and teachers.

C. *Safety*

Proper steps for protecting pupils against injuries should be taken in laboratories, shops, gymnasiums, transportation facilities, and in all parts of the building or grounds were accidents are likely to occur. The school plant should be adequately protected against fire and should have fire exits.

D. *Instructional Equipment and Supplies*

Instructional equipment and supplies, such as: science apparatus, laboratory tables and demonstration desks; shop tools and machinery; gymnasium equipment and supplies; equipment for home economics and agricultural laboratories; equipment and supplies for commercial, art, and music rooms; audio-visual aids equipment; maps and charts; library books, text books, and supplies should be adequate and used in such a way as to meet the needs of instruction for all courses and activities offered.

E. *Library*

1. *Materials.* The library should be conceived of as a communications center. The number and kind of library and reference books, periodicals, newspapers, pamphlets, information files, audio-visual materials, and other learning aids should be adequate[11] for the number of pupils and the needs of instruction in all courses offered.

2. *Location and Equipment.* a. The library room, or combination library-study hall, should be easily accessible, should accommodate approximately ten percent of the enrollment, should be attractive in appearance, and should contain standard library equipment, such as: reading tables, desks or desk-chairs, chairs, librarian's desk, cabinets for card catalogs, magazine and newspaper racks, dictionary stands, and filing cabinets. In judging the adequacy of library space, consideration should be given to modifying factors in individual schools and to the extent to which library facilities are decentralized.

b. The record system should include a shelf list, alphabetically arranged card catalogs, an accession record, and should be classified by the Dewey Decimal system or other classification system acceptable to the State Com-

[11] Quality of service and adequacy may be measured by the use of Section F, Library Services of the *Evaluative Criteria.*

mittee. The central library may be supplemented by departmental or classroom libraries of frequently changed materials appropriate to the work of individual classes.

F. *Special Services*

Adequate provision should be made according to the individual needs of each school for such special services as rest rooms, cafeteria, dining rooms, kitchens, clinics, infirmary facilities, and study and sleeping quarters.

G. *Protection of Pupil Records; Care and Storage of Equipment and Supplies*

Ample provision should be made for the safekeeping, systematic arrangement, and care of all materials, supplies, and apparatus used in the instructional and activity program, and the storage of all financial and personnel records and reports. An annual inventory is made of all equipment and supplies. A fireproof vault should be provided, or a safe which meets underwriters' specifications.

# The Constitution of the Association[1]

ARTICLE I. NAME

The name of this Association shall be the North Central Association of Colleges and Secondary Schools.

ARTICLE II. OBJECT

The object of the Association shall be the development and maintenance of high standards of excellence for universities, colleges, and secondary schools, the continued improvement of the educational program and the effectiveness of instruction on secondary and college levels through a scientific and professional approach to the solution of educational problems, the establishment of cooperative relationships between the secondary schools and colleges and universities within the territory of the Association, and the maintenance of effective working relationships with other educational organizations and accrediting agencies.

ARTICLE III. TERRITORY AND MEMBERSHIP

*Section 1.* The territory of the Association shall consist of the states of Arizona, Arkansas, Colorado, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, New Mexico, North Dakota, Ohio, Oklahoma, South Dakota, West Virginia, Wisconsin, and Wyoming and/or such areas as may be hereafter included. Territory shall be excluded from or included within the jurisdiction of the Association only upon the recommendation of the Executive Committee and by the vote of the Association. The recommendation of the Executive Committee shall be based on substantial evidence indicating that the action recommended represents the desire of the universities, colleges, and secondary schools of the territory concerned.

*Section 2.* The membership of the Association shall consist of three classes: (1) universities, colleges, and secondary schools; (2) officers of the Association and members of the Commissions; and (3) honorary members. Only members of Class 1 are eligible to vote at official meetings of the Association.

It shall be understood that membership in the Association for universities, colleges, and secondary schools is purely voluntary. Although all decisions of the Association bearing on the policy and management of universities, colleges, and secondary schools are advisory in character, it shall be understood that the Association has the right to establish requirements for membership, to develop and establish criteria for the evaluation of universities, colleges, and secondary schools, and to establish and maintain all regulations and conditions for continued membership in the Association.

*Section 3.* Any university, college, or secondary school which has been approved by the Association shall be admitted to membership on the payment of the annual dues. Such membership shall cease if at any time the university, college, or secondary school resigns or is dropped from the approved list of the Association or if the annual dues are more than one year in arrears. Any lapse in membership shall date from July 1 next succeeding the An-

[1] As amended at the 1954 Annual Meeting of the Association. The amendments are italicized in *Article IV, Sections 1, 3, 4, 5.*

nual Meeting at which time action was taken to drop the member university, college, or secondary school in question.

*Section 4.* All individuals holding membership on commissions of the Association or serving as elected officers of the Association shall thereby become members of the Association.

*Section 5.* Honorary members shall be nominated by the Executive Committee and elected by the Association by a two-thirds vote of all members present and voting at any session of the Association held during the Annual Meeting. Such individuals are honorary members of the Association and not honory members of any particular commission.

*Section 6.* Honorary members shall receive the NORTH CENTRAL ASSOCIATION QUARTERLY and shall have all the privileges of membership in the Association except voting.

*Section 7.* Honorary members, officers of the Association, and members of the commissions shall not be required to pay dues as hereinafter defined.

*Section 8.* Members of the Association, honorary members, individuals officially connected with a university, college, or secondary school which holds membership in the Association, and individuals who are officially connected with the state department of public instruction of a state which is included in the territory of the Association shall have the right to attend the meetings and to participate in the activities of the Association and of the various commissions. It shall be understood, however, that attendance at such meetings and participation therein shall be in accordance with the provisions of this constitution and also with the policies adopted by the various commissions and by the Executive Committee.

ARTICLE IV. OFFICERS, COMMISSIONS, AND COMMITTEES

*Section 1.* The officers of the Association shall be a president, a vice president, a secretary, and a treasurer. The president and vice president shall be elected at the Annual Meeting of the Association for a single term of one year or until their successors are elected. *The secretary and the treasurer shall be appointed by the Executive Committee.* Their terms of office shall be determined by the Executive Committee.

All officers of the Association and of the commissions shall be officially and actively connected with a university, college, or secondary school which holds membership in the Association or with the state department of education of a state in the territory of the Association as defined in Article III, Section 1.

*Section 2.* There shall be an Executive Committee, a Commission on Colleges and Universities, a Commission on Secondary Schools, and a Commission on Research and Service, and these shall be constituted as hereinafter defined.

The Executive Committee and the various commissions of the Association shall, within the limitations imposed by the constitution of the Association, have the right to determine their own procedures and to establish rules and regulations for governing such procedures.

*Section 3. The Executive Committee.* The Executive Committee of the North Central Association of Colleges and Secondary Schools shall consist of the president, the vice president, the president of the Association during the preceding year, the treasurer, *the editor of* THE QUARTERLY, the chairman and the secretary of each of the commissions provided for in Article IV, Section 2, and four additional members,

one of whom shall be elected each year for a term of four years. Qualifications for membership on the Executive Committee shall be the same as prescribed for officers of the Association in Article IV, Section 1.

The Executive Committee shall receive from the Commission on Colleges and Universities the list of colleges and universities recommended for membership in the Association, shall receive from the Commission on Secondary Schools the list of secondary schools recommended for membership in the Association, *and shall submit them to the Association for final approval.* It shall publish in the official organ of the Association, the NORTH CENTRAL ASSOCIATION QUARTERLY, the lists of universities, colleges, and secondary schools approved by the Association,

The Executive Committee shall have final authority to hear appeals from the decisions of the commissions, relative to the approval of universities, colleges and secondary schools and to determine the action to be taken upon such appeals.

The Executive Committee shall be under no obligation to a member university, college, or secondary school to consider any appeal from the decision or action taken by a commission unless such appeal is filed with the Executive Committee within thirty days following the Annual Meeting. Before taking final action on an appeal, the Executive Committee shall request the officers of the commission concerned to make a recommendation and to submit therewith all facts pertinent to the case.

*The Executive Committee shall submit to the Association for election those persons nominated by the respective commissions for membership therein in accordance with the provisions of the constitution.*

The Executive Committee shall determine the time and place of the Annual Meeting of the Association, prepare the programs for the meetings of the Association, approve all programs for the meetings of the various commissions, provide for the publication of reports and proceedings, and transact any necessary business. The Executive Committee shall also fill all interim vacancies in the offices of the Association, and upon recommendation of the commissions concerned shall fill interim vacancies in the membership of the various commissions.

It shall be the duty and responsibility of the Executive Committee to coordinate *and publicize* the work of the various commissions in such ways as to further most effectively the object of the Association.

The Executive Committee shall have the power to authorize and approve all expenditures of funds and to require each commission to submit it to a budget. The proposed budget submitted by each commission to the Executive Committee for approval shall be a complete forecast embracing (1) the program of activities, (2) the estimated receipts together with their sources, and (3) the estimated expenditure necessary to carry out the work of the commission. It shall be the duty and responsibility of the Executive Committee to approve or disapprove in advance of any commitments the proposed program of activities of each commission.

At each Annual Meeting the Executive Committee shall submit to the Association a detailed report of income and expenditures. At the close of the fiscal year the Executive Committee shall require an official audit of all Association Accounts to be made by an auditor selected by the treasurer and approved by the Executive Committee. The audited report shall be published in the NORTH CENTRAL ASSOCIATION QUARTERLY.

All actions taken by the Executive Committee shall be subject to approval or revision by the Association with the exception of actions taken relative to those matters over which the Executive Committee has been given final authority.

*Section 4. The Commission on Colleges and Universities.*

The Commission on Colleges and Universities shall consist of forty-eight persons, thirty from the member colleges and universities and eighteen from the member secondary schools. These shall be elected by the Commission subject to the approval of the Association for a period of three years, ten members of the first group, and six of the second to be elected annually.

No member of the Commission may serve more than two terms consecutively, except the Secretary of the Commission and except in the case of a member of the Board of Review who shall automatically remain a member of the Commission until his retirement from the Board.

The officers of the Commission on Colleges and Universities shall be a chairman, a vice chairman, and a secretary. These officers shall be elected by the Commission in accordance with its own policies and regulations. The length of term for each officer shall be determined by the Commission.

There shall be a Board of Review whose membership shall consist of the chairman of the Commission, ex officio chairman of the Board of Review; vice chairman of the Commission, ex officio vice chairman; the secretary of the Commission, ex officio secretary and four members of the Commission to be elected by the Commission for overlapping terms of six years each, and upon the expiration of this term no member may succeed himself.

The Commission shall prepare a statement of policy to guide member colleges and universities and also colleges and universities seeking approval by the Association, which statement of policy shall be submitted by the Executive Committee to the Association for approval or rejection; shall receive and consider applications and reports from colleges and universities within the territory seeking approval for membership in the Association; shall make such examinations and surveys of these colleges and universities as it deems necessary; shall make examinations or surveys of member colleges and universities as conditions may require; shall request periodic reports from member colleges and universities; shall prepare a list of colleges and universities recommended by the Commission for accrediting by the Association; shall submit this list to the Executive Committee for *submission to the Association for final approval;* shall submit to the Executive Committee for final approval by the Association the list of individuals elected to membership on the Commission; shall submit its proposed budget to the Executive Committee for approval; and shall make and publish studies of educational problems approved by the Executive Committee.

The Commission on Colleges and Universities may, with the approval of the Executive Committee, grant a college or university the necessary freedom to carry on any educational experiment that the Commission has approved.

During the interval between the Annual Meetings of the Association, the Board of Review shall have the authority to carry on the necessary business of the Commission on Colleges and Universities.

*Section 5. The Commission on Secondary Schools.*

The Commission on Secondary Schools shall consist of the members of the Committee on Secondary Schools

for each of the several states comprising the territory of the Association and eighteen other persons elected by the Commission subject to the approval of the Association for a period of three years, one-third of this number to be elected each year.

The State Committee on Secondary Schools shall consist of:

1. A member of the faculty of the state university whose assignment is in the field of secondary education, to be nominated by the president of the university;
2. the director of secondary education of the state department of public instruction or, in case there is no such officer, a member of the staff of the commissioner of education or superintendent of public instruction, designated by him;
3. and, for states having fewer than 300 high schools accredited by the Association, three administrative heads of secondary schools accredited by the Association; and, for states having 300 or more high schools accredited by the Association, five administrative heads of secondary schools accredited by the Association.

In the event that the president of the state university should refuse or fail to designate a member of the faculty to serve on the State Committee of Secondary Schools, and/or in the event that the superintendent of public instruction or commissioner of education should refuse or fail to designate a member of his staff to serve on the State Committee, the Executive Committee of the Association shall fill such vacancies by nominating for election by the Association persons recommended by the Commission on Secondary Schools.

The administrative heads of secondary schools to be included in the membership of a State Committee shall be selected for membership by majority vote of the administrators of the member schools of the North Central Association within the state. Their names shall be transmitted to the Secretary of the Commission on Secondary Schools by the chairman of the state committee. Upon approval of the Commission on Secondary Schools, the names shall be transmitted to the Executive Committee which shall place the names in nomination for election by the Association. The chairman of each State Committee shall be designated by the Commission on Secondary Schools in accordance with its adopted procedures subject to the approval of the Executive Committee. The term of membership of administrative heads of secondary schools on State Committees shall be three years. No such member shall serve more than two consecutive three-year terms.

No member of the Commission on Secondary Schools may serve for more than six years consecutively, excepting (1) the two members of each State Committee who represent the state university and the state department of public instruction respectively and who automatically shall remain members of the Commission until their retirement from the State Committee, and (2) members of the Administrative Committee of the Commission on Secondary Schools, who automatically shall remain members of the Commission until their retirement from the Administrative Committee.

The officers of the Commission on Secondary Schools shall be a chairman, and a secretary. These officers shall be elected by the Commission in accordance with its own policies and regulations. The length of term of each officer shall be determined by the Commission.

There shall be an Administrative Committee of the Commission on Sec-

ondary Schools composed of the chairman of the Commission, ex officio chairman of the administrative Committee; the secretary, ex officio secretary; the preceding chairman; and four members elected by the Commission at the time of the Annual Meeting of the Association for a period of four years, one member to be elected each year.

The Commission shall prepare for the guidance of member schools and secondary schools seeking the approval of the Association a bulletin setting forth policies, regulations, conditions for accrediting, and criteria for the evaluation of secondary schools. Prior to the publication of this bulletin, it shall be submitted by the Executive Committee to the Association for approval or rejection. The Commission shall receive and consider applications and reports from secondary schools within the territory of the Association seeking approval for membership in the Association; shall make such examinations and evaluations of these schools as it deems necessary; shall make such examinations or evaluations of member schools as conditions may require; shall request periodic reports from member schools; shall prepare a list of secondary schools recommended by the Commission for accrediting by the Association; shall submit this list to the Executive Committee for *submission to the Association for final approval;* shall submit to the Executive Committee for final approval by the Association the lists of members elected by the Commission; shall submit its proposed budget to the Executive Committee for approval; and shall make and publish studies of educational problems approved by the Executive Committee.

The Commission on Secondary Schools may, with the approval of the Executive Committee, grant a secondary school the necessary freedom to carry on any educational experiment that the Commission has approved.

During the interval between the Annual Meetings of the Association, the Administrative Committee of the Commission on Secondary Schools shall have the authority to carry on the necessary business of the Commission on Secondary Schools. During this interval, the secretary of the Commission shall have the authority to interpret policies, regulations, and criteria. Any appeal from the interpretations and decisions of the secretary of the commission shall be made to the Executive Committee.

*Section 6. The Commission on Research and Service.*

The Commission on Research and Service shall consist of twenty-four persons; twelve from member colleges and universities and twelve from member secondary schools. These shall be elected by the Commission subject to the approval of the Association for a period of three years, four members of each group to be elected annually. No member of this Commission shall serve for more than two consecutive three-year terms.

The officers of the Commission on Research and Service shall be a chairman, a vice chairman, and a secretary. These officers shall be elected by the Commission in accordance with its own policies and regulations, but subject to the limitations imposed by the constitution. All officers of the Commission shall be selected from among those who are members of the Commission, and it shall be understood that the term of each officer shall not extend beyond the date of the expiration of his term as a member of the Commission.

There shall be a Steering Committee whose membership shall be determined by the Commission in accordance with

its own policies and regulations.

The Commission on Research and Service shall initiate, plan, and carry forward studies in the fields of educational and institutional research and service pertaining to universities, colleges, and secondary schools, subject to the approval of the Executive Committee; shall, subject to the approval of the Executive Committee, engage in such research, study, and activity as either of the other commissions may request; shall engage in such research, study, and activity as the Executive Committee may request; shall report its findings to the appropriate commission or commissions and to the Association, as directed by the Executive Committee; shall submit its proposed budget to the Executive Committee for approval; shall submit to the Executive Committee for final approval by the Association the list of individuals elected to membership by the Commission; and shall funish leadership in interpreting its research findings and in focusing attention on those problems which are in need of consideration.

During the interval between the Annual Meetings of the Association, the necessary work and business of the Commission on Research and Service shall be administered by a committee consisting of the officers of the Commission.

*Section 7. Nominating Committee.*

Prior to each Annual Meeting of the Association, the president shall appoint subject to the approval of the Executive Committee, a committee of five persons whose duty it shall be to nominate properly qualified persons for election to the offices of president and vice president, to membership on the Executive Committee, and to any office not elsewhere provided for by the constitution. The announcement of these nominations shall be made during the first session of the Association held during the Annual Meeting, but election shall take place during a later session. Independent nominations may be made upon the written petition of any ten persons who are members of the Association or official representatives of member institutions. The list of persons so nominated shall be filed with the secretary of the Association not later than twelve hours prior to the opening of the session during which the election of officers is to take place.

*Section 8. The Editorial Board.*

The Editorial Board shall consist of the president, secretary, and treasurer of the Association, the secretaries of the commissions, and a managing editor selected by the Executive Committee.

### ARTICLE V. MEETINGS

There shall be an Annual Meeting of the Association at such time and place as may be determined by the Executive Committee and approved by the Association. Meetings of the various commissions shall be held during the week of the Annual Meeting of the Association. Other meetings of the Association and/or other meetings of any commission may be held when such meetings are authorized by the Executive Committee and approved by the Association.

### ARTICLE VI. FEES

An annual fee shall be paid by each member university, college, and secondary school. The amount of the fee shall be fixed by the Executive Committee, subject to the approval of the Association.

Member universities, colleges, and secondary schools are entitled to have the services of the Association and to receive the NORTH CENTRAL ASSOCIATION QUARTERLY and/or such other

publications as may be authorized for distribution.

### ARTICLE VII. THE RIGHT TO VOTE

*Section 1.* Only members of a commission shall have the right to vote at official meetings of the commission of which they are members.

*Section 2.* All votes at official meetings of the Association shall be by member universities, colleges and secondary schools. Each member university, college, and secondary school shall have only one vote on any question before the Association, and this vote shall be cast by an officially designated representative.

### ARTICLE VIII. QUORUM

Fifty voting members of the Association shall constitute a quorum for conducting business at any official meeting of the Association.

### ARTICLE IX. AMENDMENT

This constitution may be amended by a three-fourths vote of the voting members at any official meeting of the Association, providing that a printed notice of any proposed amendments has been sent to each individual who is a member of the Association and to each member university, college, and secondary school at least two weeks prior to the date of said meeting.

### ARTICLE X. PROCEDURE

Parliamentary procedure in all meetings of the Association and of the commissions shall be in accordance with *Robert's Rules of Order*.
